Frontend Developer at Niceplanet Geotecnologia, Remote

June 2022 — June 2024

- Developed web applications focused on traceability and socio-environmental compliance for agribusiness, following Scrum methodology.
- Implemented responsive and accessible user interfaces using React, JavaScript, and Styled Components. Integrated GIS (Geographic Information Systems) for mapping and geospatial data visualization.
- Collaborated in an agile team to deliver high-quality solutions, ensuring code maintainability and performance.
- Managed version control and collaborative development using Git.
- Skills: React, JavaScript, TypeScript, Styled Components, Git, GIS, Google Cloud Platform, Scrum, Agile Methodology, Web Development, Responsive Design.

Frontend Developer at Projuris By Softplan, Remote

May 2021 — May 2022

- Developed and maintained web applications for the legal sector, delivering robust and user-friendly solutions.
- Created responsive and scalable interfaces using Angular and TypeScript, ensuring high code quality and maintainability.
- Wrote and maintained unit and end-to-end tests with Jest and Cypress to ensure application reliability.
- Utilized Docker for containerization and BitBucket for version control and collaborative workflows.
- Collaborated with cross-functional teams in an agile environment to meet project deadlines and requirements.
- Skills: Angular, TypeScript, SCSS, Docker, BitBucket, Cypress, Jest, Web Development, Agile Methodology, Responsive Design.

Software Developer at Federal University of Tocantins, On-site

October 2020 — November 2021

- Maintained Python 3 middleware for HTTP communication between physical access gates and web applications.
- Developed Mifare card readers using Arduino and C++ for access control systems.
- Built web applications for educational process management using PHP (Symfony), Django, and Bootstrap 5.
- Designed and implemented user interfaces with Figma, focusing on usability and user experience.
- Managed databases using MySQL and Doctrine, and maintained version control with Git.
- Skills: Python, PHP, Symfony, Django, Arduino, C++, Bootstrap 5, MySQL, Doctrine, Git, Figma, Web Development, Middleware, IoT.

Web Developer at Institute of Attention to Cities (IAC), On-site

February 2019 — February 2020

- Developed a web application for managing water resource grants, enabling efficient environmental licensing processes.
- Implemented frontend components using Angular 8/9 and Bootstrap for responsive and intuitive user interfaces.
- Built backend services using Spring Framework with Kotlin, ensuring robust and scalable application performance.
- Managed database operations with PostgreSQL and maintained version control using Git.
- Skills: Angular 8/9, Spring Framework, Kotlin, Bootstrap, PostgreSQL, Git, Requirements Gathering, Full-stack Development, Web Applications.

Education

MBA in Software Engineering, University of São Paulo (USP/Esalq)

Expected: 2025

Bachelor's in Computer Science, Federal University of Tocantins (UFT)

Completed: 2022

Technical Course in Computer Networks and Programming, Military Police School of Tocantins

Completed: 2015
